The following is an examiner's statement of reasons for allowance: Nicollet et al. '092 or Montgelard '100 does not teach or suggest means for actuating the lever; the actuating means being separate from the displacement means and being installed free to translate on the gripping body along a direction approximately parallel to the longitudinal direction of the gripping body between a rest position and an actuation position in which the actuating means make the lever move from the retracted position to the extended position, and the displacement means being shaped such that the lever is in a stable equilibrium position when in the retracted position and when in the extended position, and the lever passing through an intermediate unstable equilibrium position when pivoting from one of the two stable equilibrium positions to the other in combination with other structural limitations.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to PAUL T. CHIN whose telephone number is (571) 272-6922. The examiner can normally be reached on MON-THURS (7:30 -6:00 PM).
